# Driving the digital advantage

Colorvation is AkzoNobel's unique approach to vehicle refinishes based on the most advanced digital color technology available. Moving across to a digital platform brings measurable improvements to your refinishing processes – **greater accuracy, greater efficiency and ultimately, greater profitability.**

Colorvation's digital color matching tool, the Automatchic Vision, puts the power of digital innovation into your hands. Traditional color matching techniques take time and experience to achieve the right result. The compact, hand-held Automatchic Vision spectrophotometer uses the latest digital technology for precise, reliable color measurements. It is easy to use and requires minimal training. To streamline processes, the latest version of Automatchic™ is wifi enabled.

The Automatchic Vision will not only help increase your business profitability through process optimization, accuracy and speed, it also boosts sustainability by using less

paint, reducing waste and saving valuable time. Customers can find the right color up to three times faster when color matching digitally with the Automatchic Vision compared to traditional methods. In some cases, users report an average reduction in paint use of up to 20% after adopting Colorvation's digital color tooling. When combined with AkzoNobel's color retrieval software, you have access to more than two million colors and variants. AkzoNobel's Colorvation sets the new industry standard in digital color matching.
