

## Names you can trust

Wanda is supported by the vast resources, advanced technology and R&D commitment of a global leader – AkzoNobel.

Wanda's own vehicle refinishing heritage and reputation stretch back for over 80 years – beginning in Brazil in 1934.

Already well established as the leading value brand in Latin America, it joined the AkzoNobel family in 1974. With AkzoNobel's backing, Wanda's network has expanded worldwide. It is now a smart global brand with a local approach, manufacturing close to each market in which it operates.

# What makes Wanda the smart choice?

## Color smart

Your customers demand a perfect color match. As part of the AkzoNobel family, Wanda makes color matching easy with world-leading digital color technology – Automatchic Vision and MIXIT. Vehicle color is measured quickly and precisely using Automatchic Vision's hand-held spectrophotometer. MIXIT, the world's fastest and easiest color retrieval tool, finds the right formula from its huge database. These tools are central to AkzoNobel's Colorvation initiative, helping bodyshops to access digital color and gain its full benefit. See [colorvation.com](http://colorvation.com) for details.

## Simply smart

Wanda's complete system covers everything – from repairing a small scratch or dent to doing a full respray. What's more, with Wanda you need fewer components, and they are easier to use. Simple choices, simple mixing ratios and simple processes save you time all the way. In short, the result you want is simple to achieve.

## Value smart

Wanda gives you AkzoNobel quality at an affordable price. It also reduces labor and material costs. How? The compact system requires less stock investment and management; application is quick and easy; and the accurate digital color tools and uncomplicated approach mean no errors or reworks.

### Putties and fillers

Specialized and all-purpose solutions to fill surface irregularities and dents both large and small. Excellent adhesion, filling power and sandability. Creating a smooth base for painting. Look out also for the Grey Shades Concept, which reduces basecoat consumption.

### Basecoats and clearcoats

A world of colors becomes possible with a minimum of toners. We cover standard and variant colors, including solid, metallic, pearlescent and xiralllic. Our WB basecoat and range of clearcoats create the ideal final effect.

### Ancillaries

We provide all of the ancillary products needed for perfect results. They include a compact family of universal thinners and hardeners, offering flexible drying options for different situations.

### Colorvation

The Wanda mixing machine system is backed by tried-and-tested color processes and advanced digital color measurement and retrieval tools. Together they ensure precise color matching every time.
